

Alpha Bio Systems

If someone told you they grew bacteria for a living, you would most likely be immediately appalled, then wonder silently to yourself, “what kind of person grows bacteria”? Well, the answer to that question can be easily answered through participating in the partnership opportunity offered by Alpha Biosystems (ABS). At ABS the fine art of growing and blending microbes has been perfected and you might be surprised by how their products are used. In the end, Alpha BioSystems is about delivering solutions to your problems. And that leads you right back to The Alpha Difference. A process firmly grounded in sound proven science that delivers measurable results.

This partnership is 6 consecutive Fridays beginning on June 10th and will run every F through July 22nd (miss the Friday before the 4th). Each meeting will be from 10am until 12:30pm (this includes a working lunch from 12-12:30). The first 3 sessions will be spent learning about Admin/Customer Service, Sales & Marketing and Shipping/Packaging. The next 2 sessions will be spent learning about the small business world in more general terms with some of the employees of the company, and the last session would be spent preparing a presentation full of observations, and solutions for the company on the various topics you will have learned about.

For more info check out the ABS website:
